DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to copying data to an isochronous data transfer packet; extracting from the isochronous data packet; and storing on a storage medium, classified in class 386, subclass 81.
 - II. Claims 20-23, drawn to copying a digital video data block containing the data from a storage medium; extracting data from the digital video data block; and formatting the data in a format other than the format of the digital video data block, classified in class 386, subclass 124.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the first group (combination) discloses a device converting data from a first format to a second format; converting back from the second format to the second format; and recording the data in the second format on the recording medium. The second group (subcombination) discloses reading data and converting from a first format to a second format. The subcombination has separate utility such as converting from a first format to a second format for

transmission to a display, a broadcast station, etc. The second group does not have to send the data to a recording medium as disclosed in the first group.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
